

The Better Choice

GOPRO ELIMINATES NOZZLE PLUGGING ON HOT MELT / GLUE SYSTEMS
"PLUG-FREE" NOZZLE DISPENSING - CONSISTENT GLUING - REDUCED DOWNTIME
GOPRO FILTERED DISPENSING VALVE MODULES INSTALL IN 2 MINUTES

GOPRO NLT™ Filtered Hot Melt Adhesive Valve Modules

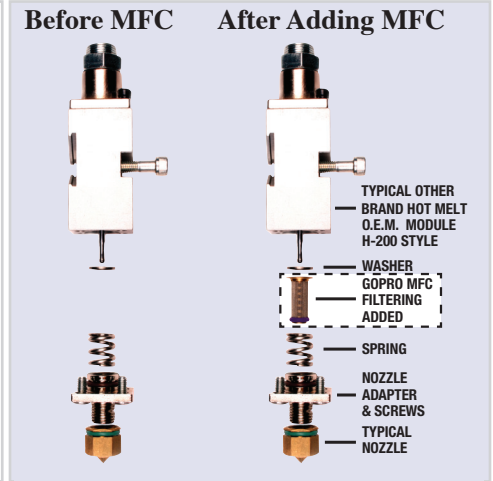

*Internal Filter Prevents Nozzle Plugging
 Installs On Systems In Under 2 Minutes*

GOPRO Micro-Cavity™ Precision Nozzles

*Precise Nozzle Dispensing
 Prevents Adhesive Stringing*

GOPRO Filtering For Other Brands "MFC" Module Filter Cartridges

*Eliminates Hot Melt Nozzle Plugging
 Easily Installs In Under 2 Minutes*

BENEFITS:

- Installs onto OEM dispensing systems in under 2 minutes
- Adhesive filtering (prevents nozzle plugging & downtime)
- Adhesive seal & filter cartridge (easy seal & filter replacement in minutes to extend module life)
- Floating valve stem assembly (prevents wear, extends life)
- Industry standard porting and mounting (easy upgrading of most hot melt module brands)
- Accepts all industry standard 3/8-24 UNF threaded nozzles
- Longer valve life at competitive pricing for added value and customer satisfaction

BENEFITS:

- Precise flow and bead placement accuracy within + or - 4 degrees of centerline reduces rejects, ensures bond quality and provides adhesive savings. (Most typical nozzle brands + or - 19 degrees.)
- Anti-Cling™ barrel design with minimized adhesive cavity to prevent adhesive stringing for clean trouble-free production
- One piece design provides higher quality and durability for long term use.
- Available in orifice sizes .008" (.20mm) to .040" (1.0mm).
- Orifice size identification in metric and inches for global use.
- Industry standard 3/8-24 UNF threaded to easily upgrade most hot melt adhesive heads, guns or valve modules used in the industry

BENEFITS:

- Patented filtering eliminates hot melt nozzle plugging.
- Low cost and installs in under 2 minutes with no required changes to the existing module parts.
- Other brand modules in inventory can be easily filtered with GoPro MFC for plug-free nozzle dispensing until upgraded to patented GoPro filtered modules.
- Increases module and nozzle life.
- Reduces module and nozzle replacement.
- Plug-free nozzle dispensing for consistent hot melt adhesive application and prevented expensive downtime.
- Cost savings from reduced replacements and reduced production downtime.
